Summary

Analytical and results-driven **Data Scientist** with a strong foundation in **computational statistics**, **machine learning**, and **data mining**. Proven ability to design scalable predictive models, run complex statistical analyses, and build robust data pipelines. Proficient in **Python**, **SQL**, and **Causal ML**, with a deep understanding of algorithm complexity. Eager to apply raw analytical smarts and collaborative energy to derive actionable insights from massive datasets at **Amazon**.

Skills

Programming & Tools: Python, SQL, R, PostgreSQL, AWS (S3, EC2, RDS), Apache Kafka

Data Science: Machine Learning, Predictive Modeling, Time-Series Analysis, Causal Inference, A/B Testing

Core Competencies: Data Mining, Computational Statistics, Algorithm Complexity, Feature Engineering

Work Experience

Open Source Contributor

[Open Source Projects](#) | Completed

- **Uber (PR #1041):** 100% reproducibility in machine learning confidence intervals secured by uncoupling the core bootstrap algorithms from the global random number generator in CausalML.
- **Uber (PR #1042):** Substantially optimized Conditional Average Treatment Effect (CATE) scoring by aggressively downscaling LightGBM default leaf-node configurations for small data slices.
- **Grafana (PR #413):** Massive-scale telemetry data ingestion enabled by engineering an end-to-end data pipeline routing raw Datadog metrics directly to Grafana Alloy.

Data Engineer / Backend Developer

[CropSky](#) | VIT-TBI Hub | 2024 - 2026

- 40% acceleration in predictive model training data collection achieved by architecting optimized backend databases and scraping pipelines.
- Actionable agricultural insights delivered to market by cross-collaborating with domain experts to build high-availability data delivery applications.

Projects

AI Demand Forecasting System

Time-Series Forecasting Architecture

Python, Prophet, XGBoost, Scikit-learn, PostgreSQL, FastAPI, Celery

- Highly accurate future inventory and revenue predictions achieved by engineering an AI-powered time-series forecasting platform using Prophet and XGBoost.
- Accelerated business insight generation by building scalable data processing pipelines to handle rolling averages, seasonal decomposition, and lag feature engineering.

Education

Int.MSc Computational Statistics and Data Analytics

VIT University | 2022-2027

Year of Graduation: 2027 : 8.4/10 CGPA | Coursework: Data Structures, Algorithms, Complexity Analysis

CS50 Programs

Harvard University (Online)

Certifications: [CS50x](#), [CS50P](#), [CS50AI](#), [CS50SQL](#), [CS50R](#)

Achievements

- **Publication** – Published a [peer-reviewed research paper](#) on [Stock Market Analysis and Prediction using ML](#). [El Ruha International Conference on Scientific Research](#), pp. 730-740, 2025.
- **Founder** – [Shoot the Breeze](#). Automated analytics processes, improving operational efficiency by 15%.
- **Rank 3 at VIT Vellore (All India Rank 4979)** – [Goldman Sachs India Hackathon 2026](#) | Score: 250.13

Certifications

- AWS [Solutions Architect](#) and [Developer](#)
- [Google Generative AI Leader](#)
- [FreeCodeCamp Legacy Full Stack](#)
- [OCI 2025 Certified Developer Professional](#)
- [Google Cloud Computing Foundations](#)
- [Software Engineer Certification - HackerRank](#)
