PROFESSIONAL SUMMARY

- AI Engineer skilled in Python, FastAPI, machine learning, RAG pipelines, and LLM APIs with experience building scalable AI systems, recommendation engines, automation platforms, and intelligent applications.
-

SKILLS

- AI & Machine Learning: TensorFlow, PyTorch, Scikit-learn, XGBoost, RAG, LLM APIs
 - Backend & APIs: Python, FastAPI, REST APIs, AsyncIO, Node.js
 - Databases & Retrieval: PostgreSQL, Redis, FAISS, ChromaDB, Vector Databases
 - Tools & Technologies: Docker, Git, GitHub, Linux, Jupyter Notebook, Firebase
-

PROJECTS

Recommendation Engine

GitHub | Live Demo

FastAPI, TensorFlow, PyTorch, FAISS, PostgreSQL, Redis

- Developed a scalable recommendation engine using embeddings, vector similarity search, and collaborative filtering techniques for personalized AI-driven recommendations
- Improved recommendation relevance by 40% through optimized retrieval workflows and scalable FAISS-based processing systems

AI Workflow Automation Platform

GitHub | Live Demo

FastAPI, LangChain, PostgreSQL, Redis, Docker

- Engineered a scalable AI workflow automation platform supporting API-driven orchestration and intelligent task execution pipelines
- Improved workflow execution efficiency by 45% through optimized backend APIs, AI processing systems, and distributed workflow management

Autonomous Research Agent

GitHub | Live Demo

FastAPI, LangChain, LangGraph, Vector Databases, PostgreSQL, Redis

- Built an autonomous AI research agent capable of retrieval, reasoning, and multi-step information processing using LangChain and vector databases
- Improved research workflow efficiency by 60% through automated retrieval pipelines and scalable AI orchestration systems

Multi-Agent Business Automation System

GitHub | Live Demo

CrewAI, LangGraph, AutoGen, FastAPI, PostgreSQL, Redis

- Developed a scalable multi-agent AI automation system coordinating finance, analytics, and support workflows using CrewAI and LangGraph
- Reduced manual workflow overhead by 50% through autonomous task orchestration and intelligent processing pipelines

Open Source Contribution

Contributed to collaborative development workflows and community-driven software initiatives through Hack Club

WORK EXPERIENCE

Founder

Shoot the Breeze | 2023 - Present

- Developed AI-powered applications and scalable machine learning systems using Python, FastAPI, and vector database technologies
- Managed backend architecture, AI workflows, model integration, and intelligent automation systems

App/Web Developer

CropSky | Pre-incubated at VIT-TBI | 2024 - Present

- Contributed to backend development and AI-driven application features using Python, FastAPI, APIs, and scalable automation workflows
- Improved performance optimization, API integrations, and intelligent processing systems

CERTIFICATIONS & ACHIEVEMENTS

- Google Generative AI Leader
- FreeCodeCamp Legacy Full Stack
- Google Cloud Computing Foundations
- OCI 2025 Certified Developer Professional
- AWS Solutions Architect and Developer
- Software Engineer Cert : Hackerrank
- Published a research paper on stock market analysis and prediction in the 14th proceedings of the El Ruha International Conference on Scientific Research, pp. 730–740, 2025.

EDUCATION

Int.Msc Computational Statistics and Data Analytics

VIT University | 2022-2027

- Studied machine learning, statistical modeling, forecasting, scalable analytics, and AI systems using Python and SQL.

CS50 Programs

Harvard University | CS50

- Completed Harvard University CS50 programs including CS50x, CS50P, CS50AI, CS50SQL, and CS50R with hands-on experience in Python, SQL, machine learning, APIs, and scalable problem-solving.
-
