PROFESSIONAL SUMMARY

- Agentic AI Developer skilled in LangChain, LangGraph, FastAPI, RAG pipelines, and LLM APIs with experience building autonomous AI systems, multi-agent workflows, retrieval systems, and scalable AI-powered applications.

SKILLS

- AI & Agent Frameworks: LangChain, LangGraph, CrewAI, AutoGen, RAG, LLM APIs
- Programming & Backend: Python, FastAPI, REST APIs, AsyncIO, Node.js
- Databases & Retrieval: PostgreSQL, Redis, FAISS, ChromaDB, Vector Databases
- Tools & Technologies: Docker, Git, GitHub, Linux, Firebase, Jupyter Notebook

PROJECTS

Autonomous Research Agent

GitHub | Live Demo

FastAPI, LangChain, LangGraph, Vector Databases, PostgreSQL, Redis, Playwright

- Built an autonomous AI research agent capable of web navigation, information retrieval, and multi-step reasoning using LangChain and LangGraph
- Improved research workflow efficiency by 60% through automated retrieval pipelines, vector search optimization, and scalable AI orchestration

Multi-Agent Business Automation System

GitHub | Live Demo

CrewAI, LangGraph, AutoGen, FastAPI, PostgreSQL, Redis, Docker

- Developed a multi-agent automation system coordinating finance, analytics, and support agents using CrewAI, AutoGen, and LangGraph
- Reduced manual business workflow overhead by 50% through autonomous task delegation and AI-driven orchestration pipelines

AI Workflow Automation Platform

GitHub | Live Demo

Next.js, React Flow, FastAPI, LangChain, PostgreSQL, Redis, Docker

- Engineered a full-stack AI workflow automation platform supporting dynamic AI task orchestration and real-time execution pipelines
- Improved workflow execution efficiency by 45% through optimized backend APIs, Redis queues, and scalable AI processing systems

Recommendation Engine

GitHub | Live Demo

FastAPI, TensorFlow, PyTorch, FAISS, PostgreSQL, Redis

- Developed a hybrid recommendation engine using embeddings, vector similarity search, and collaborative filtering for personalized AI-driven recommendations
- Improved recommendation relevance by 40% through scalable FAISS retrieval systems and optimized embedding workflows

Open Source Contribution

Contributed to collaborative development workflows and community-driven software initiatives through Hack Club

WORK EXPERIENCE

Founder

Shoot the Breeze | 2023 - Present

- Developed AI-powered applications and autonomous workflow systems using Python, FastAPI, LangChain, and vector database technologies
- Managed backend architecture, AI orchestration workflows, and scalable retrieval-based application development

App/Web Developer

CropSky | Pre-incubated at VIT-TBI | 2024 - Present

- Contributed to backend development and AI-driven application features using Python, FastAPI, APIs, and scalable automation workflows
- Collaborated on performance optimization, API integrations, and intelligent system development

CERTIFICATIONS & ACHIEVEMENTS

- Google Generative AI Leader
- FreeCodeCamp Legacy Full Stack
- Google Cloud Computing Foundations
- OCI 2025 Certified Developer Professional
- AWS Solutions Architect and Developer
- Software Engineer Cert : Hackerrank
- Published a research paper on stock market analysis and prediction in the 14th proceedings of the El Ruha International Conference on Scientific Research, pp. 730–740, 2025.

EDUCATION

Int.Msc Computational Statistics and Data Analytics

VIT University | 2022-2027

- Studied machine learning, statistical modeling, forecasting, and scalable AI/data systems using Python and SQL.

CS50 Programs

Harvard University | CS50

- Completed Harvard University CS50 programs including CS50x, CS50P, CS50AI, CS50SQL, and CS50R with hands-on experience in Python, SQL, machine learning, backend systems, and computational problem-solving.
-
