PROFESSIONAL SUMMARY

- Backend Developer skilled in Python, Django, FastAPI, PostgreSQL, and Docker with experience building scalable APIs, backend systems, real-time applications, and cloud-based web platforms.
-

SKILLS

- Backend Development: Python, Django, FastAPI, REST APIs, Node.js, AsyncIO
 - Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis
 - Cloud & Tools: Docker, AWS, Git, GitHub, Linux, Postman
 - Technologies: CI/CD, Firebase, WebSockets, Scalable Backend Systems
-

PROJECTS

AI Workflow Automation Platform

GitHub | Live Demo

Next.js, FastAPI, Django, PostgreSQL, Redis, Docker

- Developed a scalable backend workflow automation platform using Django, FastAPI, PostgreSQL, and Redis to support real-time task orchestration
- Improved workflow execution efficiency by 45% through optimized REST APIs, async processing, and scalable backend architecture

Distributed Collaboration Platform

GitHub | Live Demo

Django, FastAPI, PostgreSQL, Redis Pub/Sub, WebSockets

- Engineered a real-time collaboration platform supporting concurrent multi-user synchronization using WebSockets and Redis Pub/Sub
- Reduced synchronization latency by 40% through scalable backend systems, optimized PostgreSQL queries, and event-driven architecture

Distributed Chat System

GitHub | Live Demo

Django, Node.js, Socket.IO, PostgreSQL, Redis

- Built a scalable real-time chat backend supporting concurrent messaging, event streaming, and async communication workflows
- Improved message delivery performance by 35% through Redis caching, WebSocket optimization, and efficient database handling

Autonomous Research Agent

GitHub | Live Demo

FastAPI, Django, LangChain, LangGraph, PostgreSQL, Redis

- Developed an autonomous AI research agent capable of information retrieval, multi-step reasoning, and backend orchestration workflows
- Improved retrieval efficiency by 60% through optimized vector search pipelines and scalable AI backend systems

Open Source Contribution

Contributed to collaborative development workflows and community-driven software initiatives through Hack Club

WORK EXPERIENCE

Founder

Shoot the Breeze | 2023 - Present

- Developed scalable backend applications and REST APIs using Python, Django, FastAPI, PostgreSQL, and Docker
- Managed backend architecture, cloud deployment workflows, database optimization, and scalable API development

App/Web Developer

CropSky | Pre-incubated at VIT-TBI | 2024 - Present

- Contributed to backend development and API integrations using Python, Django, FastAPI, SQL, and scalable backend workflows
- Collaborated on debugging, performance optimization, authentication systems, and cloud-integrated application development

CERTIFICATIONS & ACHIEVEMENTS

- Google Generative AI Leader
- FreeCodeCamp Legacy Full Stack
- Google Cloud Computing Foundations
- OCI 2025 Certified Developer Professional
- AWS Solutions Architect and Developer
- Software Engineer Cert : Hackerrank
- Published a research paper on stock market analysis and prediction in the 14th proceedings of the El Ruha International Conference on Scientific Research, pp. 730–740, 2025.

EDUCATION

Int.Msc Computational Statistics and Data Analytics

VIT University | 2022-2027

- Studied scalable web technologies, analytics systems, and modern application development using Python and SQL.

CS50 Programs

Harvard University | CS50

- Completed Harvard University CS50 programs including CS50x, CS50P, CS50AI, CS50SQL, and CS50R with hands-on experience in Python, SQL, backend systems, APIs, and scalable problem-solving.
-
