

SUJITH S

Data Engineer | Python • SQL • Apache Spark • Kafka • Airflow • PostgreSQL

☎ +91 9843579926 ✉ sujithssd14@gmail.com 🐙 su-jin1425 🌐 sujith1425.vercel.app 📄 sujith14

PROFESSIONAL SUMMARY

- Data Engineer skilled in Python, SQL, Apache Spark, Kafka, and Airflow with experience building scalable ETL pipelines, streaming data systems, analytics workflows, and distributed data processing platforms.
-

SKILLS

- Data Engineering: Apache Spark, Apache Kafka, Apache Airflow, ETL Pipelines, dbt
 - Programming & Databases: Python, SQL, PostgreSQL, MySQL, MongoDB, Redis
 - Data Processing & Analytics: Pandas, NumPy, Forecasting, Data Orchestration
 - Tools & Technologies: Docker, Git, GitHub, Linux, FastAPI, Jupyter Notebook
-

PROJECTS

Real-Time Stock Market Data Pipeline

GitHub | Live Demo

Apache Kafka, Apache Spark, Apache Airflow, PostgreSQL, dbt

- Designed a real-time data pipeline processing streaming stock market datasets using Apache Kafka, Spark, and Airflow
- Improved analytics processing efficiency by 55% through automated ETL workflows, scalable orchestration, and optimized PostgreSQL storage

ETL Pipeline for E-Commerce Analytics

GitHub | Live Demo

Apache Airflow, PostgreSQL, dbt, Docker

- Developed an automated ETL pipeline for e-commerce analytics using Apache Airflow, PostgreSQL, and dbt
- Reduced reporting latency by 45% through scalable data transformation workflows and optimized orchestration pipelines

Social Media Sentiment Lakehouse

GitHub | Live Demo

Apache Spark, Delta Lake, Apache Kafka, MLflow

- Engineered a scalable sentiment analytics lakehouse processing streaming social media datasets using Apache Spark and Kafka
- Improved large-scale analytics processing through distributed data workflows and optimized Delta Lake storage management

Recommendation Engine

GitHub | Live Demo

Python, TensorFlow, FAISS, PostgreSQL, Redis

- Built a scalable recommendation pipeline using embeddings, vector similarity search, and collaborative filtering techniques
- Improved recommendation relevance by 40% through optimized retrieval workflows and distributed data processing systems

Open Source Contribution

Contributed to collaborative development workflows and community-driven software initiatives through Hack Club

WORK EXPERIENCE

Founder

Shoot the Breeze | 2023 - Present

- Developed scalable ETL workflows, analytics pipelines, and data-driven systems using Python, SQL, and PostgreSQL
- Managed data orchestration, backend processing workflows, and distributed analytics solutions

App/Web Developer

CropSky | Pre-incubated at VIT-TBI | 2024 - Present

- Contributed to backend data workflows, API integrations, and scalable analytics processing systems using Python and SQL
- Improved reporting efficiency, performance optimization, and distributed data pipeline reliability

CERTIFICATIONS & ACHIEVEMENTS

- Google Generative AI Leader
- FreeCodeCamp Legacy Full Stack
- Google Cloud Computing Foundations
- OCI 2025 Certified Developer Professional
- AWS Solutions Architect and Developer
- Software Engineer Cert : Hackerrank
- Published a research paper on stock market analysis and prediction in the 14th proceedings of the El Ruha International Conference on Scientific Research, pp. 730–740, 2025.

EDUCATION

Int.Msc Computational Statistics and Data Analytics

VIT University | 2022-2027

- Studied scalable analytics systems, distributed data workflows, forecasting, and modern data technologies using Python and SQL.

CS50 Programs

Harvard University | CS50

- Completed Harvard University CS50 programs including CS50x, CS50P, CS50AI, CS50SQL, and CS50R with hands-on experience in Python, SQL, data systems, APIs, and scalable problem-solving.
-
