PROFESSIONAL SUMMARY

- Data Scientist skilled in Python, SQL, machine learning, and statistical modeling with experience building predictive systems, analytics pipelines, forecasting models, and data-driven applications using modern AI and data technologies.

SKILLS

- Programming & Analytics: Python, SQL, Pandas, NumPy, Scikit-learn
- Machine Learning & AI: TensorFlow, XGBoost, Time Series Forecasting, RAG, LLM APIs
- Data Engineering & Visualization: PostgreSQL, Apache Airflow, Power BI, Tableau
- Tools & Technologies: FastAPI, Docker, Git, GitHub, Linux, Jupyter Notebook

PROJECTS

Demand Forecasting System

GitHub | Live Demo

FastAPI, Prophet, Statsmodels, Scikit-learn, XGBoost, PostgreSQL

- Developed a demand forecasting system using Prophet, XGBoost, and statistical modeling techniques to analyze historical business trends and improve prediction accuracy
- Reduced forecasting error by 35% through feature engineering, time-series analysis, and scalable data processing workflows

Recommendation Engine

GitHub | Live Demo

FastAPI, TensorFlow, PyTorch, FAISS, PostgreSQL, Redis

- Built a hybrid recommendation engine using collaborative filtering, embeddings, and vector similarity search to generate personalized recommendations
- Improved recommendation relevance by 40% through optimized embedding workflows and scalable FAISS-based retrieval systems

Real-Time Stock Market Data Pipeline

GitHub | Live Demo

Apache Kafka, Apache Spark, Apache Airflow, PostgreSQL, dbt

- Designed a real-time financial analytics pipeline processing streaming stock market datasets using Apache Kafka, Spark, and Airflow
- Improved analytics processing efficiency by 55% through automated ETL workflows, scalable orchestration, and optimized PostgreSQL storage

HR Workforce Intelligence Platform

GitHub | Live Demo

React, FastAPI, PostgreSQL, Redis, Scikit-learn, XGBoost

- Developed a workforce analytics platform for employee trend analysis and predictive insights using Scikit-learn and XGBoost
- Improved workforce reporting efficiency by 50% through automated analytics dashboards and scalable backend data workflows

Open Source Contribution

Exploring open-source contributions in cloud-native and backend engineering projects

WORK EXPERIENCE

Founder

Shoot the Breeze | 2023 - Present

- Developed data-driven applications and analytics systems using Python, SQL, FastAPI, and machine learning workflows
- Managed backend development, predictive analytics integration, and scalable data processing solutions

App/Web Developer

CropSky | Pre-incubated at VIT-TBI | 2024 - Present

- Contributed to backend development and AI-driven application features using Python, FastAPI, SQL, and analytics workflows
- Collaborated on performance optimization, API development, and scalable data processing systems

CERTIFICATIONS & ACHIEVEMENTS

- Google Generative AI Leader
- FreeCodeCamp Legacy Full Stack
- Google Cloud Computing Foundations
- OCI 2025 Certified Developer Professional
- AWS Solutions Architect and Developer
- Software Engineer Cert : Hackerrank
- Published a research paper on stock market analysis and prediction in the 14th proceedings of the El Ruha International Conference on Scientific Research, pp. 730–740, 2025.

EDUCATION

Int.Msc Computational Statistics and Data Analytics

VIT University | 2022-2027

- Studied machine learning, statistical modeling, forecasting, multivariate analysis, and scalable analytics using Python, SQL, and modern data technologies.

CS50 Programs

Harvard University | CS50

- Completed Harvard University CS50 programs including CS50x, CS50P, CS50AI, CS50SQL, and CS50R with hands-on experience in Python, SQL, machine learning, backend systems, and computational problem-solving.
-
