## University Talent Acquisition

Stripe

Bengaluru, Karnataka, India

### Subject: Application for Operations Associate, Apprenticeship (Jan 2027)

Dear Hiring Manager,

I am writing to express my strong interest in the Operations Associate Apprenticeship role at Stripe. With a **user-first mindset** and a passion for finding process-oriented solutions, I am deeply motivated by Stripe's mission to increase the GDP of the internet. As a student graduating in 2027, I am fully available for the 6-month apprenticeship starting in January 2027 in Bengaluru.

My background perfectly aligns with the analytical thinking and technical troubleshooting required for this role:

- **Technical Troubleshooting & Communication:** In my open-source work across organizations like Adobe, Google, and Uber, I have **diagnosed and resolved complex technical bugs**. This required excellent English communication skills to document accurate records, engage in open-ended research, and coordinate resolutions with senior stakeholders globally.
- **Process Automation & Internal Tooling:** I engineered an **AI Workflow Automation Platform** that translated complex business requirements into user-friendly internal tools. This **automated critical business processes** and reduced manual overhead, directly mirroring Stripe's view of operations as an enabler of growth.
- **Operational Efficiency:** As the Founder of Shoot the Breeze, I built tools that **improved operational efficiency by 15%**. Similarly, at CropSky, my process-oriented approach **accelerated spatial data processing by 40%** while ensuring we actively gathered user feedback to support three major product launches.

I am an organized self-starter who enjoys learning about complex financial products and collaborating in a quick-moving, in-office environment. I would be thrilled to bring my passion for problem-solving and operational excellence to Stripe's support team. Thank you for your time and consideration, and I look forward to the possibility of discussing my application with you.

Sincerely,

Sujith S
