

SUJITH S

Cloud Engineer | AWS • GCP • Docker • Kubernetes • Python • CI/CD • FastAPI

☎ +91 9843579926 ✉ sujithssd14@gmail.com 🐙 su-jin1425 🌐 sujith1425.vercel.app 🌐 sujith14

PROFESSIONAL SUMMARY

- Cloud Engineer skilled in Python, FastAPI, Docker, AWS, OCI, and Google Cloud with experience building scalable backend systems, REST APIs, CI/CD workflows, and cloud-native applications.
-

SKILLS

- Languages & Backend: Python, SQL, JavaScript, FastAPI, REST APIs, AsyncIO
 - Cloud & DevOps: AWS, Google Cloud Platform (GCP), OCI, Docker, Kubernetes, CI/CD
 - Databases & Tools: PostgreSQL, MySQL, MongoDB, Git, GitHub, Linux, Postman
 - AI & Data: Machine Learning, RAG, LLM APIs, FAISS, ChromaDB, Pandas
-

PROJECTS

Multi-Cloud Kubernetes Deployment Platform

[GitHub](#) | [Live Demo](#)

Kubernetes, Helm, Terraform, GitHub Actions, Prometheus, Grafana, AWS, GCP, Azure

- Engineered a multi-cloud Kubernetes deployment platform across AWS, GCP, and Azure, reducing deployment time by 60% using Terraform, Helm, and GitHub Actions
- Implemented centralized monitoring with Prometheus and Grafana, improving infrastructure visibility and reducing incident detection time by 45%

Serverless Event Processing System

[GitHub](#) | [Live Demo](#)

AWS Lambda, SQS, SNS, DynamoDB, API Gateway

- Built a serverless event-driven processing system handling 50K+ asynchronous events using AWS Lambda, SQS, SNS, and DynamoDB
- Optimized cloud resource utilization and API response workflows, reducing operational overhead by 35% through event-based architecture

Cloud Cost Optimization Dashboard

[GitHub](#) | [Live Demo](#)

React, Next.js, FastAPI, PostgreSQL, Redis, AWS Cost APIs, Docker, Kubernetes

- Developed a cloud cost optimization dashboard analyzing 100K+ cloud usage records using FastAPI, PostgreSQL, Redis, and AWS Cost APIs
- Reduced infrastructure cost analysis time by 70% through automated reporting, containerized deployment, and real-time monitoring workflows

AI DevOps Agent

[GitHub](#) | [Live Demo](#)

FastAPI, LangChain, Kubernetes, Docker, Terraform, Prometheus, Grafana, PostgreSQL

- Built an AI-powered DevOps automation agent capable of monitoring Kubernetes workloads and identifying deployment anomalies using Prometheus and Grafana
- Automated infrastructure troubleshooting and log analysis workflows, reducing manual debugging effort by 50% using FastAPI and LangChain

Open Source Contribution

Actively exploring open-source ecosystems and cloud-native technologies through continuous learning and community engagement

WORK EXPERIENCE

Founder

Shoot the Breeze | 2023 - Present

- Developed and deployed scalable web applications and backend APIs using Python, FastAPI, SQL, and cloud technologies.
- Managed end-to-end software development workflows including system design, deployment, API optimization, and cloud-based infrastructure.

App/Web Developer

CropSky | Pre-incubated at VIT-TBI | 2024 - Present

- Contributed to backend development and AI-driven solutions by building and optimizing application features based on business requirements.
- Collaborated in a team environment on development tasks, debugging, API improvements, performance optimization, and maintaining overall code quality.

CERTIFICATIONS & ACHIEVEMENTS

- Google Generative AI Leader
- FreeCodeCamp Legacy Full Stack
- Google Cloud Computing Foundations
- OCI 2025 Certified Developer Professional
- AWS Solutions Architect and Developer
- Software Engineer Cert : Hackerrank
- Published a research paper on stock market analysis and prediction in the 14th proceedings of the El Ruha International Conference on Scientific Research, pp. 730–740, 2025.

EDUCATION

Int.Msc Computational Statistics and Data Analytics

VIT University | 2022-2027

- Studied statistical modeling, machine learning, time-series forecasting, and scalable data analytics using Python, SQL, and modern database technologies.

CS50 Programs

Harvard University | CS50

- Completed Harvard University CS50 programs including CS50x, CS50P, CS50AI, CS50SQL, and CS50R building strong foundations in Python, SQL, backend development, cloud-oriented workflows, algorithms, and scalable problem-solving.
-
