

Sujith S

Software Engineer Intern | Financial Infrastructure | Full Stack

+91 9843579926 | sujithssd14@gmail.com | github.com/su-jin1425 | linkedin.com/in/sujith14 | sujith1425.vercel.app

Summary

Rigorous thinker and **ambitious builder** with a passion for scalable **financial infrastructure**. Deeply experienced in navigating multi-language codebases, shipping high-quality **open source** PRs, and leveraging **AI tools** to accelerate development. Eager to take end-to-end ownership and write production software that delivers compounding gains to **Stripe's** users.

Skills

Languages: Python, JavaScript, TypeScript, SQL, Distributed Systems

Systems & Architecture: API Development, Financial Infrastructure, Multi-Language Codebases

Computer Science: Algorithms, Object-Oriented Design, Rigorous Testing, Code Reviews, Scalability

Work Experience

Open Source Contributor

[Open Source Projects](#) | Completed

- **Adobe (PR #10560):** Zero silent data loss achieved in React UI components by finding and fixing a missing ancestor validation bug in the TreeData movement APIs (React Stately).
- **Google (PR #567):** Highly accurate hardware-software translation ensured by mapping 3D wrist rotation inputs into local axes, enabling precise swing/twist extraction for XR Blocks.
- **Uber (PR #1041):** Eliminated variance in machine learning confidence intervals by uncoupling the core bootstrap algorithms from the global random number generator in CausalML.

App / Web Developer

[CropSky](#) | VIT-TBI Hub | 2024 - 2026

- **40% acceleration** in spatial data processing achieved by writing rigorous algorithms and overcoming technical obstacles without clear precedent.
- **3 major product launches supported** by adapting quickly to cross-disciplinary feedback and driving team technical design processes from end to end.

Projects

ETL Pipeline for E-Commerce Analytics

Data Engineering & APIs

Python, FastAPI, Airflow, dbt, PostgreSQL, Celery, REST APIs

- **Processed large-scale e-commerce transactions** from diverse sources including payment gateways and APIs by designing a highly reliable Airflow/dbt data pipeline.
- **Ensured minimal defects and data quality** by implementing automated incremental loading, retry handling, and comprehensive test coverage across the data models.

Education

Int.MSc Computational Statistics and Data Analytics

VIT University | 2022-2027

Year of Graduation: 2027 : 8.4/10 CGPA | Coursework: Data Structures, Algorithms, Complexity Analysis

CS50 Programs

Harvard University (Online)

Certifications: [CS50x](#), [CS50P](#), [CS50AI](#), [CS50SQL](#), [CS50R](#)

Achievements

- **Publication** – Published a [peer-reviewed research paper](#) on [Stock Market Analysis and Prediction using ML](#). [El Ruha International Conference on Scientific Research](#), pp. 730-740, 2025.
- **Founder** – [Shoot the Breeze](#). Automated analytics processes, improving operational efficiency by 15%.
- **Rank 3 at VIT Vellore (All India Rank 4979)** – [Goldman Sachs India Hackathon 2026](#) | Score: 250.13

Certifications

- AWS [Solutions Architect](#) and [Developer](#)
- [Google Generative AI Leader](#)
- [FreeCodeCamp Legacy Full Stack](#)
- [OCI 2025 Certified Developer Professional](#)
- [Google Cloud Computing Foundations](#)
- [Software Engineer Certification - HackerRank](#)
