Summary

Detail-oriented QA practitioner pursuing an Int.MSc at VIT University (2022-2027) with strong knowledge of QA methodology and tools across device, web, and cloud-deployed applications. Experienced in black box test case execution on desktop and mobile platforms, accurate bug logging, SLA-aligned defect tracking, daily data capture using ADB and scripting tools, and delivering clear escalation reports and individual status updates. Holds AWS Solutions Architect and Developer certifications with direct familiarity with the AWS ecosystem.

Education

Int.MSc Computational Statistics and Data Analytics

VIT University | 2022-2027

Coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Machine Learning, NLP, Distributed Systems

CS50 Programs

Harvard University (Online)

[CS50x](#), [CS50P](#), [CS50AI](#), [CS50SQL](#), [CS50R](#) – algorithms, AI, Python, SQL, and full-stack development.

Skills

Testing & QA: Manual Test Case Execution, Black Box Testing, Regression Testing, Functional Testing, Cross-Platform Testing (Desktop & Mobile), Feature Deep Dive, Version Comparison, Bug Logging & Failure Reporting

QA Operations: ADB (Android Debug Bridge), SLA Tracking, Defect Escalation, Status Reporting, Daily Data Capture, QA Methodology & Tools, Postman, SQL Data Validation

Cloud & Tools: AWS (Solutions Architect, Developer - Certified), Docker, Linux, Python, SQL, Git, CI/CD, PostgreSQL, Redis, Prometheus, Grafana

Work Experience

Founder

[Shoot the Breeze](#) |

2023 - Present

- Executed test cases for consumer-facing application features and AWS-deployed backend services across desktop and mobile builds; deep-dived core application functionality, compared behavior across software versions to identify regressions, and logged bugs and failures accurately against test instructions.

App/Web Developer

[CropSky](#) | VIT-TBI Research & Innovation Hub |

2024 - Present

- Executed functional and regression test cases for web application and ML-backed service builds; logged bugs and deviations accurately, adhered to defined QA procedures, escalated failures with reproducible steps, and tracked defect resolution against SLAs in collaboration with engineering teams.

Projects

Multi-Agent Business Automation System

[GitHub](#)

Python, CrewAI, LangGraph, FastAPI, PostgreSQL, Redis, Docker, AWS, Prometheus

- Performed black box testing of agentic workflow components and API features across builds; identified behavioral changes between releases, logged bugs against test instructions, and tracked resolution via Prometheus dashboards while meeting SLA and daily quality targets.

Certifications & Achievements

- [Google Generative AI Leader](#)
- [Google Cloud Computing Foundations](#)
- [FreeCodeCamp Legacy Full Stack](#)
- [OCI 2025 Certified Developer Professional](#)
- [AWS Solutions Architect](#) and [Developer](#)
- [Software Engineer Certification - HackerRank](#)
- Published a [research paper](#) on [stock market analysis and prediction](#) in the 14th proceedings of the [EI Ruha International Conference on Scientific Research](#), pp. 730-740, 2025.
