Summary

Analytical and data-driven **Risk Management Analyst** with a strong foundation in **Computational Statistics**. Proven ability to build quantitative models, forecast macroeconomic trends, and analyze complex financial data for corporate valuation and business risk assessment. Eager to leverage rigorous statistical methodologies to accurately estimate Probability of Default (PD) and Loss Given Default (LGD) at American Express.

Skills

Risk & Financial Analysis: Quantitative Credit Modeling, PD Estimation, Macroeconomic Forecasting

Data Science & Stats: Python, Time-Series Forecasting, Statistical Inference, SQL, Financial Statements

Business Intelligence: Power BI, Tableau, Advanced Excel, Corporate Valuation, Data Collection & Analytics

Work Experience

App / Web Developer

[CropSky](#) | VIT-TBI Hub | 2024 - Present

- Functioned as a core member of an agile team to accelerate spatial data collection by **40%**, leveraging precise **quantitative analysis** and data-driven programming methodologies.
- Converted complex ideas into execution across **3 major product launches**, rigorously testing model outputs and evaluating business risk before deployment.

Founder

[Shoot the Breeze](#) | 2023 - Present

- Conducted **fundamental analysis** of local businesses, automating operations to improve their financial efficiency and profitability by over **30%**.

Projects

[Real-Time Stock Market Data Pipeline](#)

Financial Markets & Analytics

Python, Pandas, NumPy, Apache Kafka, PostgreSQL, Power BI

- Engineered a real-time analytics platform to ingest, transform, and analyze live financial market data.
- Implemented robust pipelines for **market trend analysis**, volatility calculation, price analytics, and anomaly detection, directly mirroring the rigor needed for evaluating global institutional exposures.

[Demand Forecasting System](#)

Macroeconomic Trends & Modeling

Python, Statsmodels, Scikit-learn, Pandas, XGBoost, Tableau

- Developed an AI-powered forecasting platform to predict future business growth and revenue using rigorous **statistical and machine learning models**.
- Modeled macroeconomic trends, seasonal decomposition, rolling averages, and external regressors to provide actionable recommendations and **confidence interval estimations**.

Education

Int.MSc Computational Statistics and Data Analytics

VIT University | 2022-2027

Year of Graduation: **2027 : 8.4/10 CGPA** | Coursework: Statistics, Economics, Finance, Mathematics

CS50 Programs

Harvard University (Online)

[CS50x](#), [CS50P](#), [CS50AI](#), [CS50SQL](#), [CS50R](#) – Python, SQL, Data Analytics

Publications

- Published a [peer-reviewed research paper](#) on [Stock Market Analysis and Prediction](#) – applied statistical data modeling to financial markets. [El Ruha Conference](#), 2025.

Achievements

- [Open Source Contributions](#) – Resolved **13 GitHub issues** and submitted **17 pull requests** to major repositories, including [Uber CausalML](#) (Statistical / Causal Modeling), [scikit-learn-contrib](#), and [Grafana](#).
- Rank 3 at VIT Vellore (All India Rank 4979)** – [Goldman Sachs India Hackathon 2026](#) | Score: 250.13

Certifications

- [Google Cloud Computing Foundations](#)
- [OCI 2025 Certified Developer Professional](#)
- AWS [Solutions Architect](#) and [Developer](#)
- [Google Generative AI Leader](#)
- [FreeCodeCamp Legacy Full Stack](#)
- [Software Engineer Certification - HackerRank](#)
