

Sujith S

Data Scientist Intern | Forecasting & Prediction | Statistical Modeling
+91 9843579926 | sujithssd14@gmail.com | github.com/su-jin1425 | linkedin.com/in/sujith14 | sujith1425.vercel.app

Summary

Analytical Data Scientist Intern with a strong foundation in computational statistics, machine learning, and data mining. Proven ability to manipulate data, perform model selection, cross-validation, and deploy analytical models at scale. Proficient in **Python, R, and SQL**, with hands-on experience in forecasting and prediction techniques. Eager to utilize statistical techniques to solve root business problems and uncover areas of opportunity at **Amazon**.

Skills

Programming & Tools: Python, SQL, R, PostgreSQL, TensorFlow, PyTorch, AWS

Core: Machine Learning, Forecasting & Prediction, Model Training & Cross-Validation, Data Transformation

Competencies: Computational Statistics, Algorithm Complexity, Feature Engineering, Root Cause Analysis

Work Experience

Open Source Contributor

[Open Source Projects](#) | Completed

- **Uber (PR #1031):** Improved predictive model stability by testing, debugging, and resolving variance anomalies in CausalML.
- **scikit-learn-contrib (PR #125):** Maintained reliable variance estimates for random forest models by optimizing core statistical components.
- **Grafana (PR #413):** Engineered robust observability pipelines to route telemetry metrics and support data-driven analysis.

App / Web Developer [Full Stack]

[CropSky](#) | VIT-TBI Hub | 2024 - 2026

- Accelerated analytical model training by architecting optimized backend databases and scraping pipelines for raw data collection.
- Collaborated with cross-functional teams to transform and analyze data, delivering actionable agricultural insights and business recommendations.

Projects

AI Demand Forecasting System

Time-Series Forecasting Architecture

Python, Prophet, XGBoost, Scikit-learn, PostgreSQL, SQL, Cross-Validation

- Achieved highly accurate future inventory predictions by engineering an AI-powered time-series forecasting platform using Prophet and XGBoost.
- Built scalable data processing pipelines to manipulate and transform data, handling rolling averages and seasonal decomposition for automated deployment.

Education

Int.MSc Computational Statistics and Data Analytics

VIT University | 2022-2027

Year of Graduation: 2027 : 8.4/10 CGPA | Coursework: Data Structures, Algorithms, Complexity Analysis

CS50 Programs

Harvard University (Online)

Certifications: [CS50x](#), [CS50P](#), [CS50AI](#), [CS50SQL](#), [CS50R](#)

Achievements

- **Publication** – Published a [research paper](#) on [Stock Market Analysis and Prediction using ML](#).
- **Founder** – [Shoot the Breeze](#). Translated business requirements into custom digital information components to optimize efficiency.
- **Rank 3 at VIT Vellore** – [Goldman Sachs India Hackathon 2026](#), outperforming 500+ participants.

Certifications

- AWS [Solutions Architect](#) and [Developer](#)
- [Google Generative AI Leader](#)
- [FreeCodeCamp Legacy Full Stack](#)
- [OCI 2025 Certified Developer Professional](#)
- [Google Cloud Computing Foundations](#)
- [Software Engineer Certification - HackerRank](#)
