Summary

Detail-oriented data and AI practitioner currently pursuing Int.MSc Computational Statistics and Data Analytics at VIT University (2022-2027), with hands-on experience collecting, labeling, and validating ground truth data for machine learning and AGI product development. Skilled at accurately executing data capture tasks, following dynamic instructions and operational guidelines, communicating results clearly, and meeting daily productivity and quality targets. Proficient in English (read, write, speak), Microsoft Office, and software tools used for structured data collection and reporting. Published researcher with a strong track record of producing reliable, high-quality outputs under defined procedures.

Education

Int.MSc Computational Statistics and Data Analytics

VIT University | 2022-2027

Coursework: Machine Learning, Deep Learning, Statistical Modeling, NLP, Data Structures & Algorithms, Distributed Systems, Database Systems

CS50 Programs

Harvard CS50 (Online)

Completed [CS50x](#), [CS50P](#), [CS50AI](#), [CS50SQL](#), and [CS50R](#) covering algorithms, AI, Python, and full-stack systems.

Skills

Data Operations: Ground Truth Collection, Data Annotation, Data Labeling, Quality Assurance, Data Validation, Data Capture, Accuracy Reporting, SLA Adherence, Productivity Tracking

Tools & Productivity: Microsoft Office (Word, Excel, PowerPoint), Google Workspace, Data Entry Software, SQL, Python, MLflow, PostgreSQL

Machine Learning & AI: Machine Learning Data Pipelines, NLP, Agentic AI, Deep Learning, Reinforcement Learning, LLMs, Statistical Modeling

Frameworks & Libraries: PyTorch, TensorFlow, Hugging Face Transformers, LangChain, Scikit-learn, XG-Boost, FAISS

Cloud & Infrastructure: AWS (Lambda, S3, SageMaker), Docker, CI/CD Pipelines, Linux/Unix

Languages: English (Fluent - Read, Write, Speak), Python, Java, SQL, R, JavaScript

Work Experience

Founder

[Shoot the Breeze](#) |
2023 - Present

- Collected and curated ground truth datasets for AI model training and evaluation; designed data capture workflows, validated outputs for accuracy and consistency, and maintained detailed status reports against daily productivity and quality targets.
- Executed structured data annotation and labeling procedures for agentic AI and forecasting features; escalated failures and ambiguities through defined reporting channels, ensuring zero SLA breaches on data delivery.

App/Web Developer & Data Contributor

[CropSky](#) | VIT-TBI Research & Innovation Hub |
2024 - Present

- Executed repetitive structured data collection and validation tasks against defined guidelines to feed ML model pipelines; queried large-scale datasets, documented results accurately, and communicated progress and failures to cross-functional teams.
- Followed dynamic task instructions for data capture and reporting, met daily output targets, and complied with organizational data quality processes for a university-incubated AI startup.

Research & Publications

Stock Market Analysis and Prediction Using Machine Learning

2025

[El Ruha International Conference on Scientific Research](#), pp. 730-740. Collected, cleaned, and annotated large financial time-series datasets; evaluated 21 ML models with rigorous accuracy reporting and documented results in a peer-reviewed publication. [\[GitHub\]](#)

Projects

Demand Forecasting System

[GitHub](#)

Python, Prophet, XGBoost, FastAPI, PostgreSQL, MLflow, Docker, AWS

- Designed and executed structured data collection and ground truth labeling pipelines for time-series forecasting; validated data quality at each stage, tracked model performance metrics, and produced accurate result reports for revenue and inventory prediction.

Multi-Agent Business Automation System

[GitHub](#)

Python, CrewAI, LangGraph, LangChain, FastAPI, PostgreSQL, Docker, AWS

- Built data capture and annotation workflows supporting agentic AI product development; maintained accurate execution logs, applied dynamic operating instructions for multi-step data tasks, and reported quality metrics and failures through structured escalation processes.

Recommendation Engine

[GitHub](#)

Python, PyTorch, FAISS, Sentence Transformers, FastAPI, PostgreSQL, Docker

- Collected and labeled ground truth preference data to train and evaluate personalized recommendation models; ensured data accuracy and consistency across annotation cycles, documented outcomes, and met quality baselines for model training inputs.

Certifications & Achievements

- [Google Generative AI Leader](#)
- [Google Cloud Computing Foundations](#)
- [FreeCodeCamp Legacy Full Stack](#)
- [OCI 2025 Certified Developer Professional](#)
- AWS [Solutions Architect](#) and [Developer](#)
- [Software Engineer Certification - HackerRank](#)
