Summary

Detail-oriented quality assurance practitioner pursuing Int.MSc Computational Statistics and Data Analytics at VIT University (2022-2027), with practical experience executing manual test procedures for GUI, web, and consumer-facing applications, validating software outputs against defined specifications, and accurately reporting test results and deviations. Familiar with QA methodology, GUI testing workflows, and software testing tools across front-end interfaces, backend services, and consumer device applications. Experienced following structured task instructions, understanding changes in test procedures, meeting daily output targets, and adhering to defined quality processes. Strong analytical mindset with a published research background and a track record of producing accurate, high-quality results under process-driven constraints.

Education

Int.MSc Computational Statistics and Data Analytics

VIT University | 2022-2027

Coursework: Machine Learning, Deep Learning, Statistical Modeling, NLP, Data Structures & Algorithms, Distributed Systems, Database Systems

CS50 Programs

Harvard CS50 (Online)

Completed [CS50x](#), [CS50P](#), [CS50AI](#), [CS50SQL](#), and [CS50R](#) covering algorithms, AI, Python, and full-stack systems.

Skills

Quality Assurance: Manual Test Execution, GUI Testing, UI Validation, Test Case Design, Defect Reporting, Deviation Identification, Test Result Documentation, QA Methodology, Regression Testing, Functional Testing, Process Adherence, Daily Target Management

Testing Tools & Platforms: Postman (API Testing), SQL (Data Validation), Python (Test Scripting), MLflow (Model Validation), Docker, Linux/Unix, PostgreSQL

Consumer Device & Software Testing: GUI & Front-End Testing, Web Application Testing, Consumer Device Interface Validation, REST API Testing, Backend Service Validation, End-to-End System Testing

Languages & Scripting: Python, SQL, JavaScript, TypeScript, Java, R, Bash/Shell

Cloud & Infrastructure: AWS (Lambda, S3, SageMaker), Docker, CI/CD Pipelines, Linux/Unix

Work Experience

Founder

[Shoot the Breeze](#) |
2023 - Present

- Designed and executed manual test procedures for GUI interfaces, ML-powered web applications, and REST APIs; validated UI behavior and functional outputs against defined specifications, documented deviations accurately, and reported findings to drive corrective action before production releases.
- Followed structured QA processes and task instructions to test consumer-facing GUI features end-to-end; met daily test execution targets, identified and logged UI and functional deviations, and maintained detailed test result records to ensure interface quality and reliability on AWS.
- Validated model inference outputs and REST API responses against expected results; identified and reported functional deviations, tracked defects through resolution, and ensured changes in test instructions were understood and applied promptly.

App/Web Developer

[CropSky](#) | VIT-TBI Research & Innovation Hub |
2024 - Present

- Executed functional and regression testing of ML-powered backend APIs and consumer-facing web application features at a university-incubated startup; reported test results and deviations accurately, adhered to defined QA processes, and collaborated with engineers to verify fixes met acceptance criteria.
- Validated structured data outputs from large-scale database queries against expected specifications; followed dynamic task instructions across test cycles and maintained accurate result documentation to support production quality targets.

Projects

Demand Forecasting System

[GitHub](#)

Python, FastAPI, PostgreSQL, Redis, MLflow, Docker, AWS, Prophet, XGBoost

- Designed and executed end-to-end test procedures for REST inference APIs and forecasting model outputs; validated results against expected baselines, documented deviations, and maintained MLflow experiment logs to track quality across model retraining cycles.

Multi-Agent Business Automation System

[GitHub](#)

Python, CrewAI, LangGraph, LangChain, FastAPI, PostgreSQL, Redis, Docker, AWS, Prometheus

- Performed functional testing of multi-step agentic workflows and API endpoints; identified and reported behavioral deviations in task routing and output accuracy, followed defined QA procedures across test cycles, and verified fixes against documented acceptance criteria.

Recommendation Engine

[GitHub](#)

Python, PyTorch, FAISS, FastAPI, PostgreSQL, Redis, Docker

- Executed manual and scripted tests on recommendation API responses and personalization outputs; validated relevance and accuracy of results against ground truth, documented test outcomes, and reported latency and quality deviations for resolution.

Research & Publications

Stock Market Analysis and Prediction Using Machine Learning

2025

[El Ruha International Conference on Scientific Research](#), pp. 730–740. Rigorously evaluated and validated outputs of 21 ML models against defined performance benchmarks; documented results with precision and distilled findings into a peer-reviewed publication. [\[GitHub\]](#)

Certifications & Achievements

- [Google Generative AI Leader](#)
- [Google Cloud Computing Foundations](#)
- [FreeCodeCamp Legacy Full Stack](#)
- [OCI 2025 Certified Developer Professional](#)
- AWS [Solutions Architect](#) and [Developer](#)
- [Software Engineer Certification - HackerRank](#)
