Summary

Process-driven **Quality Services professional** skilled in **QA methodology**, manual test execution, and bug tracking. Proven track record testing complex applications, accurately reporting deviations, and meeting strict daily targets. Adept at quickly mastering test procedures and following defined processes to ensure flawless end-user experiences for **Amazon Kids**.

Skills

QA Methodology: Manual Test Execution, Defect Reporting, Regression Testing, Test Instructions

Testing Tools & Environments: Issue Tracking (GitHub, Jira), Application Testing, Consumer Devices

Core Competencies: Accurate Results Reporting, Deviation Identification, Daily Target Execution, Agile

Work Experience

Open Source Contributor

[Open Source Projects](#) | Completed

- **Adobe (PR #10560):** Prevented UI data loss by identifying API defects and executing isolated regression tests to validate fixes.
- **Google (PR #567):** Ensured accurate 3D rotation tracking by debugging XR hardware inputs and validating multiple edge-case scenarios.
- **Uber (PR #1041):** Guaranteed 100% ML reproducibility by isolating random generator bugs and implementing comprehensive regression testing.

APP / Web Developer

[CropSky](#) | VIT-TBI Hub | 2024 - Present

- Reduced production defects by 40% by mastering **application test procedures** and executing precise manual release testing.
- Met aggressive daily launch targets by collaborating cross-functionally and strictly adhering to **defined QA processes**.

Projects

Real-Time Data Pipeline Validation

QA & Test Execution

Manual Testing, Defect Tracking, System Validation, Process Documentation

- Guaranteed high-throughput data accuracy by executing documented test instructions and rapidly reporting observed deviations.
- Validated real-time system performance by tracking anomalies and accurately reporting test results in a fast-paced environment.
