

Sujith S

Software Development Engineer | Distributed Systems · Full SDLC · Algorithms · Python & C/C++
+91 9843579926 | sujithssd14@gmail.com | github.com/su-jin1425 | linkedin.com/in/sujith14 | sujith1425.vercel.app

Skills

Programming Languages: Python, Java, C/C++, SQL, TypeScript

CS Fundamentals: Object-Oriented Design, Algorithm Design, Data Structures, Complexity Analysis

Systems & Architecture: Distributed Systems, Multi-Tiered Architecture, Relational Databases, Full SDLC, Testing, Docker

Work Experience

App / Web Developer

[CropSky](#) | VIT-TBI Research & Innovation Hub | 2024 - Present

- Drove **Full SDLC development and testing** for a **multi-tiered** agricultural application; designed core backend architecture in Python, directly influencing 3 major product launches.
- Applied **algorithm design** and **optimization mathematics** to optimize data pipelines, successfully accelerating spatial data processing capabilities by 40%.

Founder

[Shoot the Breeze](#) | 2023 - Present

- Handled **ambiguous and undefined problems** for 15+ local businesses by architecting custom automation software that significantly improved their operational efficiency.
- Effectively articulated **technical challenges and solutions** to stakeholders, translating complex **relational database** designs into scalable business tools.

Projects

[Distributed Collaboration Platform](#)

Distributed Multi-Tiered System

Python, FastAPI, Node.js, WebSockets, PostgreSQL, Redis Pub/Sub, React, Docker

- Engineered a highly scalable **distributed, multi-tiered system** enabling real-time workspace synchronization with low-latency event propagation using WebSockets and Redis Pub/Sub.
- Leveraged robust **data structures and algorithms** to handle optimistic UI updates and concurrent conflict resolution, heavily relying on **object-oriented design** principles.

Education

Int.MSc Computational Statistics and Data Analytics

VIT University | 2022-2027

Year of Graduation: 2027 : 8.4/10 CGPA | Coursework: Optimization Mathematics, Data Structures, Statistical Analysis

CS50 Programs

Harvard University (Online)

[CS50x](#), [CS50P](#), [CS50AI](#), [CS50SQL](#), [CS50R](#) – Python, C/C++, Java, Algorithm Design, Complexity Analysis

Publications

- Published a [peer-reviewed research paper](#) on [Stock Market Analysis and Prediction](#) – applied linear and nonlinear optimization algorithms. [El Ruha Conference](#), 2025.

Achievements

- [Open Source Contribution](#) – Contributed to Hack Club open-source projects by resolving 3 GitHub issues and submitting a pull request (pending review).
- **Rank 3 at VIT Vellore (All India Rank 4979)** – Goldman Sachs India Hackathon 2026 | Score: 250.13

Certifications

- [Google Cloud Computing Foundations](#)
- AWS [Solutions Architect](#) and [Developer](#)
- [FreeCodeCamp Legacy Full Stack](#)
- [OCI 2025 Certified Developer Professional](#)
- [Google Generative AI Leader](#)
- [Software Engineer Certification - HackerRank](#)
