

Sujith S

Software Development Engineer | Distributed Systems | AWS
+91 9843579926 | sujithssd14@gmail.com | github.com/su-jin1425 | linkedin.com/in/sujith14 | sujith1425.vercel.app

Summary

Innovative and customer-obsessed **Software Development Engineer** with a strong foundation in **computer science fundamentals** (data structures, algorithms, object-oriented design). Proven ability to think abstractly, design scalable **distributed systems**, and leverage **data mining** to solve ambiguous, complex problems. Proficient in **Python, Java, C/C++**, and **AWS** architecture. Eager to contribute raw smarts and collaborative energy to build mission-critical technologies at **Amazon**.

Skills

Programming Languages: Python, Java, C/C++, TypeScript, SQL, PostgreSQL

Systems & Architecture: Distributed Systems, AWS, Scalable Architecture, Relational Databases

Computer Science: Object-Oriented Design, Data Mining, Algorithms, Complexity Analysis, Mathematics

Work Experience

Open Source Contributor

[Open Source Projects](#) | Completed

- **Adobe (PR #10560):** Zero silent data loss achieved in React UI components by finding and fixing a missing ancestor validation bug in the TreeData movement APIs (React Stately).
- **Google (PR #567):** 100% accurate hardware-software translation ensured by mapping 3D wrist rotation inputs into local axes, enabling precise swing/twist extraction for XR Blocks.
- **Uber (PR #1041):** 100% reproducibility in machine learning confidence intervals secured by uncoupling the core bootstrap algorithms from the global random number generator in CausalML.

App / Web Developer

[CropSky](#) | VIT-TBI Hub | 2024 - 2026

- 40% acceleration in spatial data processing achieved by writing optimized math algorithms to streamline our data pipelines.
- 3 major product launches supported by collaborating closely with cross-disciplinary teams to build robust software solutions.

Projects

Serverless Event Processing System

Event-Driven Architecture

Python, AWS Lambda, API Gateway, DynamoDB, SQS, SNS, Terraform

- Millions of asynchronous events processed with low latency by engineering a serverless distributed architecture utilizing AWS Lambda, SQS, and SNS.
- 100% fault-tolerant workflow execution ensured by building asynchronous event pipelines using AWS Step Functions and dead-letter queues.

Education

Int.MSc Computational Statistics and Data Analytics

VIT University | 2022-2027

Year of Graduation: 2027 : 8.4/10 CGPA | Coursework: Data Structures, Algorithms, Complexity Analysis

CS50 Programs

Harvard University (Online)

Certifications: [CS50x](#), [CS50P](#), [CS50AI](#), [CS50SQL](#), [CS50R](#)

Achievements

- **Publication** – Published a [peer-reviewed research paper](#) on [Stock Market Analysis and Prediction using ML](#). [El Ruha International Conference on Scientific Research](#), pp. 730-740, 2025.
- **Founder** – [Shoot the Breeze](#). Automated analytics processes, improving operational efficiency by 15%.
- **Rank 3 at VIT Vellore (All India Rank 4979)** – [Goldman Sachs India Hackathon 2026](#) | Score: 250.13

Certifications

- AWS [Solutions Architect](#) and [Developer](#)
- [Google Generative AI Leader](#)
- [FreeCodeCamp Legacy Full Stack](#)
- [OCI 2025 Certified Developer Professional](#)
- [Google Cloud Computing Foundations](#)
- [Software Engineer Certification - HackerRank](#)
