

Sujith S

Applied Scientist Intern | Machine Learning · Deep Learning · Model Deployment

+91 9843579926 | sujithssd14@gmail.com | github.com/su-jin1425 | linkedin.com/in/sujith14 | sujith1425.vercel.app

Summary

Research-driven Applied Scientist Intern specializing in **Machine Learning, Deep Learning, and Computational Statistics**. Proven ability to design **end-to-end ML systems**, analyze large-scale datasets, and write technical research papers. Proficient in **Python and C**, with hands-on experience deploying analytical models to production. Eager to collaborate with world-class researchers to build large-scale ML solutions.

Skills

Programming: Python, C, SQL, R, PostgreSQL, TensorFlow, PyTorch, AWS

ML Research: Machine Learning, Deep Learning, Model Deployment, Large-Scale Datasets

Competencies: End-to-End System Design, Statistical Analysis, Cross-functional Collaboration

Work Experience

Open Source Contributor

[Machine Learning / QA](#) | Completed

- **Uber (PR #1031):** Debugged and resolved critical variance anomalies within CausalML, directly improving the stability and reliability of the predictive modeling framework.
- **scikit-learn-contrib (PR #125):** Partnered with engineering teams to optimize core statistical components for random forest algorithms, ensuring highly reliable variance estimates.
- **Grafana (PR #413):** Engineered pipelines to route telemetry metrics and analyze large-scale datasets.

Data Engineer / Backend Developer

[CropSky](#) | VIT-TBI Hub | 2024 - Present

- **Designed end-to-end data scraping pipelines** and optimized backend databases, drastically accelerating raw data collection by **30%** for ML model training.
- **Collaborated cross-functionally** to transform and analyze complex datasets, deploying actionable recommendations to production environments.

Projects

AI Demand Forecasting System

End-to-End ML System Design

Python, Prophet, XGBoost, Scikit-learn, PostgreSQL, SQL, Data Science

- **Owned end-to-end system design** from research to prototype, engineering a robust time-series forecasting platform leveraging **Prophet and XGBoost**.
- **Deployed models to production** using scalable data processing architectures to manipulate and transform **10,000+ daily inputs** for seasonal decomposition.

Achievements & Publications

- **Publication** – Authored and published a [research paper](#) on [Stock Market Analysis using ML](#).
- **Rank 3 at VIT Vellore** – [Goldman Sachs India Hackathon 2026](#), outperforming **500+ participants** in algorithmic problem solving.
- **Founder** – [Shoot the Breeze](#): **Translated business requirements** into custom digital information components to optimize efficiency.

Education

Int.MSc Computational Statistics and Data Analytics

VIT University | 2022-2027

Year of Graduation: 2027 : 8.4/10 CGPA | Machine Learning, Deep Learning, Statistics

CS50 Programs

Harvard University (Online)

Certifications: [CS50x](#), [CS50P](#), [CS50AI](#), [CS50SQL](#), [CS50R](#)

Certifications

- [AWS Solutions Architect](#) and [Developer](#)
- [OCI 2025 Certified Developer Professional](#)
- [Google Generative AI Leader](#)
- [Google Cloud Computing Foundations](#)
- [FreeCodeCamp Legacy Full Stack](#)
- [Software Engineer Certification - HackerRank](#)
