Summary

Computational Statistics and Data Analytics student at VIT University (2022-2027) with a peer-reviewed ML publication and hands-on experience building LLM inference pipelines, NLP classification systems, and on-device AI deployments. Proficient in designing, benchmarking, and evaluating AI/ML systems across language, vision, and forecasting domains; experienced in translating research prototypes into production-ready components using Python, Hugging Face Transformers, LangChain, and cloud-native infrastructure.

Education

Int.MSc Computational Statistics and Data Analytics

VIT University | 2022-2027

Coursework: Machine Learning, Statistical Modeling, Data Structures & Algorithms, Distributed Systems, Cloud Computing, Computer Networks, Software Engineering

CS50 Programs

Harvard CS50 (Online)

[CS50x](#), [CS50P](#), [CS50AI](#), [CS50SQL](#), [CS50R](#) – Python, AI, SQL, algorithms, full-stack development.

Skills

AI & ML: PyTorch, TensorFlow, Scikit-learn, XGBoost, Classification, Regression, Time-Series Forecasting, Feature Engineering, MLflow, Offline Evaluation & Benchmarking, Statsmodels

Language AI & NLP: Hugging Face Transformers, LangChain, LangGraph, OpenAI APIs, Prompt Engineering (few-shot, CoT, instruction-based), RAG, FAISS, ChromaDB, Sentiment Analysis, NLU, On-Device LLM (Ollama)

Data & Infrastructure: Python, SQL, R, Java, Apache Kafka, Apache Spark, PostgreSQL, Redis, Docker, AWS (Lambda, S3, RDS, EKS), FastAPI, CI/CD

Projects

Autonomous Research Agent

[GitHub](#)

Python, LangChain, LangGraph, OpenAI APIs, Hugging Face Transformers, FAISS, ChromaDB, FastAPI, PostgreSQL, Docker

- Engineered LLM inference pipelines applying few-shot, chain-of-thought, and instruction-based prompting for multi-hop reasoning and structured report synthesis; implemented RAG with FAISS/ChromaDB for grounded knowledge retrieval; designed offline evaluation frameworks benchmarking prompt strategies against ground-truth corpora across few-shot, CoT, and zero-shot baselines.

Social Media Sentiment Lakehouse

[GitHub](#)

Python, Apache Kafka, Apache Spark, Delta Lake, Hugging Face Transformers, Scikit-learn, FastAPI, PostgreSQL, Docker

- Built real-time NLP classification pipelines using Hugging Face Transformers for sentiment analysis, emotion detection, and topic modeling on streaming social data; benchmarked transformer-based NLU models across classification approaches using MLflow; applied statistical correlation analysis across large-scale text corpora.

Work Experience

Founder

[Shoot the Breeze](#) | 2023 - Present

- Designed and deployed AI-powered applications integrating LLM inference and on-device language processing; owned end-to-end research-to-deployment workflow including system design, offline evaluation, experiment documentation, and production monitoring.

App/Web Developer

[CropSky](#) | VIT-TBI Research & Innovation Hub | 2024 - Present

- Developed ML-integrated REST APIs at a university-incubated research startup; collaborated with research scientists to translate research outputs into production-ready analytical modules.

Certifications & Achievements

- [Google Generative AI Leader](#)
- [Google Cloud Computing Foundations](#)
- [FreeCodeCamp Legacy Full Stack](#)
- [OCI 2025 Certified Developer Professional](#)
- [AWS Solutions Architect](#) and [Developer](#)
- [Software Engineer Certification - HackerRank](#)
- Published a [research paper](#) on [stock market analysis and prediction](#) in the 14th proceedings of the [El Ruha International Conference on Scientific Research](#), pp. 730-740, 2025.
